

Three-Tier Covered Drug List

LOUISIANA **BLUE**  

  HMO Louisiana

2026

Understanding Your Covered Drug List

Blue Cross and Blue Shield of Louisiana and our subsidiary, HMO Louisiana, Inc., along with Express Scripts, an independent company that serves as our pharmacy benefit manager, created this *Covered Drug List* to help you understand your drug benefits. Because drug benefits can be complex, understanding your benefits is key to getting the most from your health plan.

Throughout the year, our clinical staff works with our Pharmacy and Therapeutics Committee, a group of Louisiana doctors and pharmacists who are not employed by Louisiana Blue, to review published literature about the safety, efficacy and cost of prescription drugs.

You and your doctor always make the final decision for your healthcare needs. The information in this *List* can help you and your doctor make informed decisions before you fill your next prescription. That way, together you may choose the best drug for you while keeping your costs down. Please talk to your doctor or pharmacist about any questions or concerns you may have about your drug therapy.

Please Note: Inclusion of a drug in a drug formulary does not guarantee that your doctor or other authorized prescriber will prescribe the drug for a particular medical condition or mental illness.

Before you fill a prescription for any drug, you should take the following steps, if needed:

- 1) Check to see if the drugs you take are on the drug *List*.
- 2) Talk to your doctor about switching to a drug that is on the *List*, if needed.

Important Notes:

- This *List* is intended to include all drugs that your plan covers as of the time the document was created. But the *List* may change as changes occur in the marketplace.
- This *List* may not apply to all benefit plans. Some benefit plans may have different coverage for specific drugs.
- The *List* applies only to prescription drugs that network pharmacies dispense on an outpatient basis.
- See your member contract or certificate for pharmacy coverage for any exclusions and limitations that apply.
- Your doctor could prescribe a drug that is not on this *List*. In this case, a drug formulary exception can be requested. This may not be possible for all drugs.

How can you find information about your drugs?

Use the index at the end of this *List* to look up a drug you may take to quickly learn several important things:

- If you must first try one or more prescription drugs before your plan will cover a specific drug for your condition
- If your doctor must get prior authorization before your plan will pay for a drug
- If your plan limits the quantity that will be covered each time you fill a prescription

How are prescription drugs classified?

Your plan offers a 3-tier structure for drugs that are covered:

Tier	Description of prescription drugs
1	Primarily generic drugs (traditional and specialty), although some brand drugs may fall into this category
2	Includes traditional brands and generics, specialty brands and generics and biosimilars
3	Includes traditional brands and generics, specialty brands and generics, biosimilars and covered compound drugs

Generally, you will pay the least out-of-pocket for drugs that are in Tier 1.

What does it mean when there is a “+” sign in the Tier section?

You will pay more for some covered brand drugs marked with a “+” that have lost patent protection because a generic equivalent has become available. If you or your doctor decides you should continue to take the brand drug instead of the generic drug, you will be responsible for the generic drug out-of-pocket amount, plus the difference in cost between that brand and the generic drug. This is called “brand buy up.” This will also apply to covered brand

drugs for which a generic equivalent becomes available after the publishing of this *List*.

Please Note: Brand buy up will not apply to certain brand drugs. Examples are select anti-seizure medications, select thyroid hormones and Coumadin.

What does it mean when the Tier section shows \$0 or \$0*?

Certain drugs may be eligible for first-dollar coverage. That means you do not pay out of pocket for them and you do not pay a deductible. Drugs in these programs are marked with a **\$0 or \$0*** under the tier column. Because some benefit plans do not have this type of coverage, you should read your plan materials to find out if you have it. Note that restrictions or limitations apply, including age, gender or frequency.

Broad categories of drugs that may be eligible for this coverage include:

- \$0** Selected contraceptives for women

- \$0** Selected preventive drugs as recommended by the U.S. Preventive Services Task Force (USPSTF). For example, selected bowel prep products when used with a wellness screening colonoscopy or selected generic cholesterol lowering drugs for people who qualify may be covered.

- \$0*** Selected drugs included in the \$0 Drug Copay Program. Program drugs are regularly recommended to treat asthma, chronic obstructive pulmonary disease (COPD), coronary heart disease, diabetes, heart failure and other common chronic conditions.

Example of How Drugs Are Listed:

Drug	Tier	Requirements/Limits
<i>generic drug name</i>	1	QPD
BRAND DRUG NAME	2	PA; ST
Key: <ul style="list-style-type: none"> • <i>generic drugs</i> are in lowercase <i>italics</i> • BRAND drugs are in ALL CAPS 		Key: <ul style="list-style-type: none"> PA = Prior authorization QPD = Quantity per dispensing limits ST = Step therapy restrictions SP = Specialty drug restrictions LA = Limited access

What do the abbreviations in the Requirements/Limits column mean?

PA: Medications requiring prior authorization

We must authorize certain drugs before your plan will pay for them. After considering current medical literature, the Pharmacy and Therapeutics Committee sets up the criteria needed for the drugs to be authorized. Then Express Scripts processes the prior authorization requests.

If you need prior authorization, have your doctor contact Express Scripts:

Call: 1-800-842-2015

Fax: 1-877-251-5896

For the physician fax form, go to: www.lablue.com > **Provider** > **Pharmacy**.

ST: Medications requiring participation in the Fill This First step therapy program

For drugs in our Fill This First step therapy program, you must first try certain prescription drugs (Step 1) before your plan will cover other drugs (Step 2) for your condition. If one or more of the Step 1 drugs are not right for you, your doctor may call us for a prior authorization for a Step 2 drug. You can find more information about drugs that you must try first at www.lablue.com/CoveredDrugs.

QPD: Medications that have quantity per dispensing limitations

Covered prescriptions have a day-supply limitation (typically up to a 30-day supply at a retail pharmacy and up to a 90-day supply for mail-order). Your plan also limits the amount of certain drugs that can be dispensed at one time. We call those restrictions quantity per dispensing (QPD) limits.

QPD limits are additional to the day-supply limitation and are based on the manufacturer's recommended dosage and duration of therapy, common usage for episodic or intermittent treatment, FDA-approved recommendations or clinical studies, and as determined by Louisiana Blue. QPD limits or allowances are subject to quantity limits per day supply, per dispensing event, or any combination of the two. Read your member contract or certificate for the limits for your plan. For a complete list of **Quantity per Dispensing (QPD) Level Limits/Allowances**, go to www.lablue.com/CoveredDrugs.

SP: Specialty drug restrictions

Certain drugs are commonly called specialty drugs. Specialty drugs include biotechnology drugs or other drug products that may require special ordering, handling or customer service. Your policy may limit specialty drugs to the retail day supply listed in your plan (typically a 30-day supply). Read your *Schedule of Benefits* for any restrictions that apply to you. For a complete list of specialty drugs, go to: www.lablue.com/CoveredDrugs.

LA: Medications that have limited access

Some medications require unique handling, administration or monitoring. When this is the case, the manufacturer and/or the FDA may require that the drug be dispensed only by certain pharmacies.

Questions?

If your doctor prescribes a drug that is not on this *List*, or if you have any questions, call Express Scripts at 1-866-781-7533.

For more information and updates, go to: www.lablue.com/CoveredDrugs or www.express-scripts.com.
