

prednisone delayed release tablet (Rayos[®], generics)

Policy # 00522

Original Effective Date: 01/01/2017

Current Effective Date: 06/01/2026

Applies to all products administered or underwritten by Blue Cross and Blue Shield of Louisiana and its subsidiary, HMO Louisiana, Inc. (collectively referred to as the “Company”), unless otherwise provided in the applicable contract. Medical technology is constantly evolving, and we reserve the right to review and update Medical Policy periodically.

Investigational or experimental services are not covered. This includes any drug, device, procedure, or service provided under the investigational arm of a clinical trial or clinical study. These services are excluded from coverage under benefits. .

When Services May Be Eligible for Coverage

Coverage for eligible medical treatments or procedures, drugs, devices or biological products may be provided only if:

- *Benefits are available in the member’s contract/certificate, and*
- *Medical necessity criteria and guidelines are met.*

Based on review of available data, the Company may consider prednisone delayed release tablets (Rayos[®], generics)[†] to be **eligible for coverage**.**

Patient Selection Criteria

Coverage eligibility will be considered for prednisone delayed release tablets (Rayos, generics) when the following criterion is met:

- There is clinical evidence or patient history that suggests the use of generically available oral prednisone will be/was ineffective or will/did cause an adverse reaction to the patient; AND
- If the request is for brand Rayos, patient has tried and failed (e.g., intolerance or inadequate response) GENERIC prednisone delayed release tablets unless there is clinical evidence or patient history that suggests GENERIC prednisone delayed release tablets will be ineffective or cause an adverse reaction to the patient.

When Services Are Considered Not Medically Necessary

Based on review of available data, the Company considers the use of prednisone delayed release tablets (Rayos, generics) WITHOUT clinical evidence or patient history that suggests the use of generically available oral prednisone will be/was ineffective or will/did cause an adverse reaction to the patient to be **not medically necessary**.**

Based on review of available data, the Company considers the use of brand Rayos when the patient has not tried and failed the GENERIC prednisone delayed release tablets to be not medically necessary.**

prednisone delayed release tablet (Rayos[®], generics)

Policy # 00522

Original Effective Date: 01/01/2017

Current Effective Date: 06/01/2026

Background/Overview

Rayos is FDA approved for the treatment of certain endocrine conditions, certain neoplastic conditions, and as an anti-inflammatory agent for certain allergic, dermatologic, gastrointestinal, hematologic, ophthalmologic, nervous system, renal, respiratory, rheumatologic, specific infectious diseases or conditions, and organ transplantation. It is supplied in 1, 2, and 5 mg delayed release tablets. Rayos was only studied in one trial for the treatment of rheumatoid arthritis, and it was compared to placebo in that trial. There have been generic formulations of immediate release prednisone available for many years. These generic forms of prednisone are very effective and are a very economical option for patients. There have been no head to head trials of extended release prednisone versus immediate release prednisone.

FDA or Other Governmental Regulatory Approval

U.S. Food and Drug Administration (FDA)

Rayos was approved in July of 2012 for the treatment of certain endocrine conditions, certain neoplastic conditions, and as an anti-inflammatory agent for certain allergic, dermatologic, gastrointestinal, hematologic, ophthalmologic, nervous system, renal, respiratory, rheumatologic, specific infectious diseases or conditions, and organ transplantation. Generic versions of prednisone have been available for many years.

Rationale/Source

This medical policy was developed through consideration of peer-reviewed medical literature generally recognized by the relevant medical community, U.S. Food and Drug Administration approval status, nationally accepted standards of medical practice and accepted standards of medical practice in this community, technology evaluation centers, reference to regulations, other plan medical policies, and accredited national guidelines.

The patient selection criteria presented in this policy takes into consideration clinical evidence or patient history that suggests the use of generically available oral prednisone will be/was ineffective or will/did cause an adverse reaction to the patient. Based on a review of the available data and in the absence of any of the caveats mentioned, there is no advantage of using Rayos or the generic over generically available oral prednisone. There is also no advantage of using branded Rayos over the generic.

Next Scheduled Review Date: 05/2027

****Medically Necessary (or "Medical Necessity")** - Health care services, treatment, procedures, equipment, drugs, devices, items or supplies that a Provider, exercising prudent clinical judgment, would provide to a patient for the purpose of preventing, evaluating, diagnosing or treating an illness, injury, disease or its symptoms, and that are:

- A. In accordance with nationally accepted standards of medical practice;
- B. Clinically appropriate, in terms of type, frequency, extent, level of care, site and duration, and considered effective for the patient's illness, injury or disease; and
- C. Not primarily for the personal comfort or convenience of the patient, physician or other health care provider, and not more costly than an alternative service or sequence of services at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of that patient's illness, injury or disease.

For these purposes, "nationally accepted standards of medical practice" means standards that are based on credible scientific evidence published in peer-reviewed medical literature generally recognized by the relevant medical community, Physician Specialty Society recommendations and the views of Physicians practicing in relevant clinical areas and any other relevant factors.

NOTICE: If the Patient's health insurance contract contains language that differs from the BCBSLA Medical Policy definition noted above, the definition in the health insurance contract will be relied upon for specific coverage determinations.

NOTICE: Medical Policies are scientific based opinions, provided solely for coverage and informational purposes. Medical Policies should not be construed to suggest that the Company recommends, advocates, requires, encourages, or discourages any particular treatment, procedure, or service, or any particular course of treatment, procedure, or service.

NOTICE: Federal and State law, as well as contract language, including definitions and specific contract provisions/exclusions, take precedence over Medical Policy and must be considered first in determining eligibility for coverage.

NOTICE: If an authorization for an ongoing course of treatment has been provided to a member and the member changes from one health plan to another health plan (e.g., a member moves from carrier A to Louisiana Blue), Louisiana Blue may honor the previous health plan's authorization for the same service under the same type of in-network benefit for a 90-day transition period. Documentation of the authorization for the ongoing course of treatment from the previous health plan must be provided to us by the member or their provider and the services provided for the course of treatment must otherwise be a covered service under the Louisiana Blue health plan. This provision does not apply to medications covered under the plan's pharmacy benefit.
